

After receiving recommendations from both members of the Examining Board regarding classification changes from Helper to Journeyman Spacer, the following changes have been made to the requirements effective 8/1/08.

The number of hours needed to change classification have been raised from 240 to 500 hours performing Journeyman work in the pipe gang in the last 2 years.

All helpers applying for a change of classification to Journeyman Spacer must have a minimum of 3,000 Helper hours before they may be considered.
